

Shaun Gedye

Web Developer | Software Engineer

Summary:

I believe in writing modular, highly intuitive code, following web standards and industry best practices to design responsive, mobile-first, pixel-perfect webpages. A great user experience is paramount, so creating accessible websites where the branding and the 'look and feel' are consistent across devices and browsers is a must. Stimulated by challenges and a love of learning I will be a real asset, as I not only do I have the technical know-how, but I also possess the soft-skills required to help your organisation thrive.

Tertiary Education:

Bachelor of Engineering (Software Engineering – Honours)
Curtin University

Bachelor of Science (Software Engineering)
Curtin University

Further Education:

Foundation Level Certificate in Software Testing
International Software Testing Qualifications Board

Responsive Web Design Certification
FreeCodeCamp

Javascript Algorithms & Data Structures Certification
FreeCodeCamp

Experience:

Website Designer | Site Administrator
RTG Photography

- Responsible for the planning, design, implementation and management of the RTG Photography website and branding
- Core responsibilities:
 - Designed a logo, business cards and prototype of the website
 - Setup hosting and an associated email account with cPanel
 - Created a sitemap and linked the website to Google Analytics
 - Coded the CSS, HTML and PHP, with UI Kit using Sublime Text
 - Managed the development process with Asana and PSP logs

Team Leader | Quality Assurance Manager

Software Engineering Project – Curtin University & Gaia Resources

- During this full-year project, I lead a small team in the development of a Biological Field Survey Tool for the client
- Over the lifetime of the project, my team delivered various documents, including; a Software Requirements Specification, a Software Design Document, a Quality Assurance Plan and a Software Test Document
- The project was implemented in HTML, CSS, JavaScript, JSON, and Python, using the Django web framework
